Abstract (en)
[origin: WO2008098267A1] The invention relates to a device (1) for ejecting a movable furniture part (9) from a closed end position in or on a furniture body (8), having an ejector (2) comprising a motor-driven ejector lever (3), wherein a power transmission device interacting with the ejector lever (3) is provided such that the force exerted on the movable furniture part (9) by the ejector lever (3) can be transferred in the mounted state of the device (1) in a furniture body (8), in which the movable furniture part (9) in the closed end position is at a distance from the ejector lever (3).
