Abstract (en)
[origin: WO2008096950A1] Provided is a nozzle for a cleaner. The nozzle includes a main body discharging steam to an outside, and a cleaning member supplied with the steam discharged from the main body. The main body includes a first steam discharging hole discharging the steam toward the cleaning member, and a second steam discharging hole discharging the steam in a direction other than a direction of the steam discharged by the first steam discharging hole.
