Abstract (en)

[origin: WO2008095979A1] The invention relates to a pull-out guide (3) for a disk rack (2) of a dishwasher, comprising a guide rail (3a), which can be fixed to a washing container (1) of a dishwasher, and a running rail (3c), which can be connected to a grid-like dish rack (2), and further comprising a center rail (3b) increasing the pull-out length, wherein the running rail (3c) is coupled to the center rail (3b) such that the running rail (3c) after canceling the coupling can be pulled off the center rail (3b) in the pull-out direction A. The coupling means are made of a stop (6), which is disposed on the center rail side and protrudes in the direction of the running rail (3c), and a carrier (7) engaging behind the stop (6) in the pull-out direction (A), and the carrier (7) can be moved out of the contact region with the stop (6) transversely to the pull-out direction by an actuating device (8).
