Abstract (en)

[origin: WO2008099435A1] A multi-function detaching device (1) for magnetic anti- theft mechanisms is described and comprises: a supporting body (2) ; a first elongated magnetic detaching element (3) ; a second circular magnetic detaching element (5) ; a supporting base (2A) containing the supporting body (2) in two, resting and operating positions; and means (72, 74, 76, 78, 80) for operatively connecting the supporting body (2) and the supporting base (2A) , that allow operating the body (2) within a certain operating distance range from the supporting base (2A) and provide an anti-theft alarm warning if they are tampered with in order to allow detaching the supporting body (2) from the supporting base (2A) .
