Abstract (en)

[origin: DE102007010295A1] Further thrust reverse shifts are prevented as soon as a motor vehicle's speed of travel (v F) reaches a previously determined limiting gear-speed (v G r) for thrust reverse shifts or has dropped below it (v F = v G r) or a currently engaged gear-speed corresponds to a previously determined limiting gear-speed for thrust reverse shifts. After dropping below a limiting gear-speed or after engaging a limiting gear, transition into a traction operation is prepared.
