Abstract (en)  
[origin: WO2008110154A2] The invention relates to a condensation system comprising heat exchanger elements arranged above fans which are held in fan sections (1) arranged as a frame carried by a supporting framework (2). The supporting framework (2) comprises a plurality of supports (3), at least one support (3) comprising a column (5) extending vertically in relation to the fan sections (1), and head struts (6) connecting above the column (5) and extending obliquely in relation to the fan section (1) and the column (5), said struts extending towards the corners (7) of a fan section (1).
