Abstract (en)
[origin: WO2008098268A2] The invention relates to an electric cable with cable plugs mounted on both cable ends, the cable plug mounted on the one end being configured as a male plug (1) and the cable plug mounted on the other cable end being configured as a female plug (25). Electrical contact elements (8) are fixed to the identical conductors (9, 10) of the cable (11) on both cable ends, said contact elements being all configured in the form of contact pins or all in the form of contact sockets. The contact elements (8) fixed to the one cable end are inserted in passages of the contact support (4, 26) of the cable plug mounted on said cable end and configure the plug contacts and the identical contact elements (8) fixed to the other cable end are fitted together with plug contacts (30, 38) that are retained by the contact support (4, 26) of the cable plug mounted on said cable end.
