Abstract (en)

[origin: EP2119478A1] The harness (1) has an upper part formed of front and rear thoracic straps (2, 3), extending towards a lower part for forming thigh boot straps (4, 5). The straps (2-5) are connected with each other in a dorsal connection zone formed of semi-rigid connection plate (6) and at their free ends to the straps (4, 5) by connection members (8-11). The plate forms a bottom of a storage bag (12) incorporating components e.g. straps, members, of the harness in a permanent operational manner, where the bag is made of synthetic fluorescent material. An attachment loin (7) and the bag integrate the plate.
