Abstract (en)

A method for processing bank notes in an automatic money counting station, wherein the bank notes are introduced into the money station; the introduced bank notes are guided into a money counting device, wherein the type and the amount of the bank notes are detected and are automatically registered in a control system; the bank notes are physically stored in a storage facility, whereby the storage location is registered in the control system; the registered type and the registered amount are coupled in the control system to the physical storage location of the counted bank notes; an order is placed; the physical storage location of the types and amounts of bank notes corresponding with the order are detected; and the corresponding bank notes are released for transport outside the money station.
