Abstract (en)

[origin: EP2120295A2] The circuit has a plug-in connector (2), and a plastic molded body (30) exposing a set of contact devices of line elements (20a-20d). Adjacent sections (26a-26d) of the line elements are surrounded by a magnetic core (4) in a recess of the plastic molded body. The magnetic core is directly attached to the sections of the line elements. Another set of contact devices (22a-22d) are electrically connected with a third set of contact devices of a printed circuit board. The contact devices form a male connector or a plug-in sleeve.
