Abstract (en)
[origin: WO2007087802A2] Disclosed is a sealing zipper comprising a slider, a sealing end piece, and two strips that are provided with peripheral sealing surfaces encompassing pairs of coupling members which are embodied as a molded part. The coupling members are disposed above and underneath the respective peripheral sealing surfaces while the peripheral sealing surfaces correspond to the pairs of coupling members of the other strip. The front webs of the sealing end piece, which adjoin the zipper strips in front of the last pair of coupling members, are provided with at least one guiding device for the slider in addition to the webs, the sealing end piece being configured as a pot.
