Abstract (en)

[origin: WO2008101260A2] The invention relates to a furniture body (1) having a sealing lip (2) for sealing at least one furniture part (3) that can be movably supported in or on the furniture body (3) in the closed position, wherein an ejector is provided for the furniture part (3), wherein the ejector can be activated by applying pressure onto the furniture part (3) in the closed position thereof, wherein the sealing lip (2) is configured to be compressible such that the furniture part (3) can be pushed out of the closed position thereof into the furniture body (1) until the ejector is activated.
