Abstract (en)
[origin: WO2008068294A1] The invention relates to a device and a method for producing fancy yarn or fancy ply yarn on a ring spinning machine having at least two support yarns (32) which are twisted together and fibers of a roving (22) which are introduced by means of a drafting device. A support yarn holding device accommodates at least one support yarn package (31) per drafting device of a spinning site. A support yarn guide (38) feeds in at least two support yarns which are at a distance from one another, in the region of a pair of rollers which are disposed in front of a spinning triangle.
