Abstract (en)

[origin: WO2008103127A1] The present invention relates to a dish washing or fabric washing machine comprising an electronic operating control unit (15), a memory unit (14) connected to the control unit (15) and containing washing programs (17) 5 each having a certain running time (18), wherein said machine also comprises a user control panel (11) connected to said operating control unit (15), said panel having selection means (12) for user setting of the machine operation and indicating means (13) for indicating said settings. The invention is particularly characterized in that said selection means (12) 10 comprise time setting means (16) providing the ability of setting a certain running time from a number of eligible running times (18), said set running time (18) being indicated on said indicating means (13), said memory unit (14) containing a separate washing program (17) for each of said eligible running times (18), the operating control unit (15) comprises means for 15 activating a washing program (17) that corresponds to the set running time (18).
