Abstract (en)  
[origin: WO2008113394A1] The invention relates to a device for shading a room, comprising: two guiding profiles (2), disposed opposite one another in a substantially vertical fashion, wherein a vertically displaceable carriage (3) is housed in each guiding profile (2). A flat shading element (10) is fastened to the carriages (3) that are arranged opposite one another such that, guided by the carriages (3), said shading element may be displaced vertically relative to the guiding profiles (2).
