Abstract (en)
[origin: WO2008122731A1] The invention relates to a control device (10) for controlling the starter of an automotive vehicle, that comprises: a first variable voltage generator (2); an amplifier (3) at the output of the voltage generator; a contactor (1) including an inrush winding (La), a holding winding (Lm) and a power contact (R), the contactor being supplied by the amplifier; and a module (20) for maintaining the power supply of the inrush winding of the contactor once the power contact is closed.
