Abstract (en)
[origin: WO2008098566A1] The invention relates to an illuminating device comprising a plurality of radiation reflectors (1, 2, 3, 4) that are respectively radiated by at least one light source (L). The radiation reflectors (1, 2, 3, 4) are formed such that they can be assembled in a modular manner on a radiation-reflecting luminous surface (100, 200, 300, 400).
