Abstract (en)  
[origin: EP2123409A1] The blade unit has a blade housing (1) with a front blade window, where side walls (3) limit the blade window in a longitudinal direction. A blade (4) i.e. angle blade, is provided with a cutting edge (5), which is exposed within a region of the blade window. A cover (14) is connected to the blade housing and faces a rear side (19) of the blade, where the rear side of the blade is turned away from the cutting edge. Positioning notches are provided in the blade housing, where lateral ends of the cutting edge are strikingly inserted into the notches. The cover includes an elastic component (20).
