Abstract (en)

[origin: EP2123597A1] The conveyor i.e. electric-counterweight fork-lift truck (1), has a steering connection interface designed as a changing interface, such that different steering control modules (25) from a group of alternative control modules with a respective steering wheel (23) and different ranges of control functions are connectable in an alternatively operative and mechanically secured manner. The interface includes an electrical connection unit for the actuating element and another electrical connection unit for the steering wheel to control normal driving functions and/or load lifting functions.
