Abstract (en)
The bar (1) has a base body (2), and a fitting (3) fastened to the body using a fastener (6). The fastener is formed by clamping rails (7) non-destructively detachable at longitudinal sides of the bar. Producing units (8) are attached between the rails and the body to produce a clamping force, where the units are formed by a screw i.e. setscrew, and a lever. Each rail has a metallic extruded section and a clamping surface for the fitting. A retention surface in contact with the units is provided at the body. An adhesive strip (12) is provided between the body and a base of the fitting.

Abstract (de)
Ein Deckelstab (1) für eine Karde enthält einen Grundkörper (2) und ist mit einer Garnitur (3) und wenigstens einem Befestigungsmittel für die Garnitur versehen. Das Befestigungsmittel für die Garnitur wird durch eine Klemmschiene (7) gebildet, die zerstörungsfrei lösbar ist.
