Abstract (en)

A system is disclosed for managing a mobile device adapted for reading tags(1), the mobile device (1) comprising at least one general mobile application (6), comprising a. a broker means (2) adapted for communicating with the mobile device (1), adapted for receiving tag information from the mobile device (1) by means of the general mobile application (6) when the mobile device performs a reading action of a tag; b. an application resolving means (4) for associating a set of at least 1 specific mobile application (7) for the tag, the broker means and the application resolving means being adapted for communicating with each other; c. a mobile profiling means (3) adapted for profiling mobile applications for the mobile device, the broker means being adapted for communicating with the mobile profiling means. A method for managing a mobile device adapted for reading tags is also provided.
