Abstract (en)
[origin: WO2008075384A1] The invention refers to a device for hair fashioning, comprising a handle (2), an extended heating body (3) for hair heating, a terminal element (4) and a mechanism (19) for the releasable locking of the hair ends to be fashioned, said heating body having a first end portion associated with the handle and a second end portion opposite this first end, said terminal element being associated with the heating body at the second end portion, said mechanism (19) for the releasable locking of the hair ends is associated with the terminal element and it allows not to subject the hair ends to the same high temperatures to which the remaining part of the hair tuft is subjected, for a prolonged period of time.
