Abstract (en)  
[origin: WO2008005002A1] The invention provides compositions of oligonucleotides targeted at genes involved in muscle wasting and/or muscle growth. In some embodiments, the oligonucleotides are modified. In some embodiments, the compositions contain one, or more than one, oligonucleotide. The invention also provides methods and kits using the compositions of the invention for the treatment of muscle wasting conditions and/or the promotion of muscle growth.
