Abstract (en)
[origin: WO2008086960A1] The invention is based on a transformation device, particularly a seat transformation device, for a sitting device (10), comprising at least one transformation unit (16), which has at least one input (12) and at least one output (14). According to the invention, the transformation unit (16) is provided for transforming a low voltage present at the input (12).
