Abstract (en)

[origin: FR2913239A1] Preparing a textile material support comprising a silicone coating on one or two faces comprises preparing a silicone composition; applying the silicone composition on one or two faces of the textile material support; drying and cross-linking the coated support, preferably by heating at 210[deg] C, where: the applying process takes place in coating machine with a head having three elements, which are pressure cylinder, coating cylinder and dosing element, and the coating cylinder and pressure cylinder are contacted with the textile material support. An independent claim is included for the textile material support, obtained by the above method.
