Abstract (en)

[origin: WO2008077969A1] The present invention relates to a washer/dryer (1) comprising a drum (2) wherein laundry (L) is emplaced, a humidity sensor (3) disposed inside the drum (2) that detects the moisture content of the laundry (L), and a control unit (4) that calculates the average of the moisture data (H <SUB>average</SUB>) without using the moisture data of zero or near to zero values detected by the humidity sensor (3) from the laundry (L) in a certain time duration, only taking into consideration the moisture data that is different from this moisture data and regulates the drying process according to the calculated average moisture content (H <SUB>average</SUB>).
