Abstract (en)

[origin: WO2008101269A1] The invention relates to a method for the production of a sleeper footing (7) on a sleeper body (5) of a sleeper (2) at least in regions of at least one surface (6), which in an installation position of the sleeper body (5) is directed downward to a bottom ballast (4) or a cement surface. The sleeper footing (7) is made of a plastic foam, wherein a raw material for the plastic foam is applied to the at least one surface (6) of the sleeper body (5), and the raw material is subsequently foamed into plastic foam on the surface (6).
