Abstract (en)

[origin: WO2008103031A1] The invention relates to an apparatus for driving elongate elements such as piles, drilling elements etc. into the ground, comprising a displaceable frame (2), an elongate guide (13), at least one coupling (9, 12) with which at least during use the frame and the elongate guide are coupled, pushing means with which the elongate elements are driven into the ground, which pushing means are displaceable along the elongate guide, and a drive with (15) which the pushing means can be displaced along the elongate guide.
