Abstract (en)  
[origin: US2010205729A1] Toilet flusher comprising a power source, control unit, sensor unit, and at least one first container that contains a first preparation and that may be connected to the toilet flusher, wherein the toilet flusher comprises at least one pump that cooperates with the power source, control unit, and sensor unit such that a defined dispensing amount of at least one substance preparation is dispensed independently of the arrangement of the toilet flusher in or on the toilet bowl and/or of the amount of flushing water acting on the toilet flusher.
