Abstract (en)

[origin: WO2008098559A1] The invention relates to a control block provided with a plurality of control block elements (2, 4, 6, 8, 10, 12) in each of which a valve arrangement (14, 18, 21, 22, 54) for controlling an associated hydraulic consumer (A1, B1; A3, B3; A9, B9) is provided. Said control block also comprises an oil channel (76, 80) which runs through at least one control block element (10, 12) for controlling the temperature thereof independently from the control of the valve arrangement.
