Abstract (en)
[origin: WO2008101721A1] The invention relates to an illuminated object, such as a flag, a banner, a crest, a standard, or the like, comprising at least one surface to be illuminated by at least one, preferably electrically operable, lighting means, which completely or partially illuminates the surface to be illuminated. The invention is characterized in that light emitting diodes (LEDs), thin film transistors (TFTs) and/or microlamps are provided as the lighting means. The invention also provides a lighting means and a supply and/or transport device for said lighting means.
