Abstract (en)  
[origin: DE202006019373U1] The device has a cooling chamber with at least one pair of guide grooves on at least part of its side walls on both sides in which the lateral edges of cooled goods trays can be inserted, whereby the trays have holding arrangements (6) that engage in complementary holding arrangements in the cooling chamber. A clamping part (1) can be reversibly fixed to the cooled goods tray and can engage in shape-locking manner in the gap between the guide groove and tray so that the engagement of the holding arrangement is fixed in the complementary holding arrangement.
