Abstract (en)  
[origin: WO2008103032A1] The invention relates to a method for controlling at least one light-emitting component, such as a light- emitting diode (LED), having a maximum operating voltage ( $V_f$  (max)) and current ( $I_f$  (max)) at which the component can be safely activated. The invention also relates to a control for at least one light-emitting component, such as a light- emitting diode (LED), having a maximum operating voltage ( $V_f$  (max) ) and current ( $I_f$  (max)) at which the component can be safely activated.
