Abstract (en)  
The present invention relates to a dishwasher (1) comprising a first washing compartment (10), having a washing tub (11) for receiving objects that are to be washed, and a water outlet system (12), for leading water out of the washing tub (11) to a wastewater system arranged outside the first washing compartment (10), such as a domestic wastewater system. The dishwasher (1) further comprises a second washing compartment (20), having a washing tub (21) for receiving objects that are to be washed, and a water outlet system (22), for leading water out of the washing tub (21) to a wastewater system arranged outside the second washing compartment (20), such as a domestic wastewater system. A control unit (30) is operatively associated with the first washing compartment (10) and the second washing compartment (20), the control unit (30) being arranged for controlling the water outlet system (12) of the first washing compartment (10), and the water outlet system (22) of the second washing compartment (20); such that at any given instant, at the most one water outlet system (12, 22) is leading water out of its corresponding washing tub (11, 21). The present invention also relates to a method of letting water out of such a dishwasher (1).
