Abstract (en)
A system and method for the aggregation, standardization and extension of social networking contacts to enhance a television consumer experience are described. An embodiment of a system includes a device (204) connected to one or more devices (210-216) with social networking technology. The device (204) is accessed by a user (208) to invite one or more contacts to join an aggregated social network via an aggregated social networking contact list. The aggregated social networking contact list to include all contacts associated with the one or more social networking technology devices (210-216). The device (204) to receive and store aggregated social network content and to receive main content. The device (204) to cause the display of the stored aggregated social network content overlayed on the main content via a user interface on a display device (206). Other embodiments are described and claimed.
