Abstract (en)

[origin: EP2128936A1] The device (1) has a base (13) cooperated with a base plate (2) in a stable and removable manner. The base has electrical contacts electrically cooperated with electrical connectors of the base plate, in a removable manner. The base has magnetic bodies e.g. permanent magnets, magnetically cooperated with magnetic bodies of the base plate, in a removable manner. An intermediate part (12) is extended between the base and an upper part (11) for forming an electrical extension cord. The base plate has shape complementary to a recess.
