Abstract (en)
[origin: WO2008119407A1] Method for the production of an adhesive closure device together with an apparatus and adhesive closure device produced accordingly. The invention relates to a method for the production of an adhesive closure device (10), preferably consisting of at least one plastic material, during which a backing (12) with a plurality of protruding stems (14) is connected to individual heads (16) in such a way that for at least a part of the above-mentioned stems (14), the free ends (18) thereof come into contiguous or embedded contact with a contact face (20) of each assignable head (16). The invention relates additionally to an apparatus for carrying out the method and to an adhesive closure device produced according to the method.
