Abstract (en)
[origin: WO2008107253A1] The invention relates to a hand-held machine tool, in particular a hammer drill and/or chipping hammer, comprising a transmission device (12) having a drive bearing (14) that has at least one torque-transmitting means (16) with a transmitting contour (18) for transmitting a torque onto the drive bearing (14). According to the invention, the transmitting contour (18) of the torque-transmitting means (16) is produced by axial machining and/or a stamping and/or planing process.
