Abstract (en)

[origin: WO2008125177A2] The invention relates to a communication system that comprises a vehicle electronic key, a vehicle telecommunication device and a portable telecommunication terminal, the electronic key including a first transmitter and the vehicle including a first receiver, the first transmitter and the first receiver being provided for carrying out the transmission of at least one information request from the electronic key to the vehicle, the vehicle telecommunication device including at least a second transmitter, the portable telecommunication terminal including at least a second receiver, the second transmitter and the second receiver being provided for carrying out the transmission of information from the vehicle to the portable telecommunication terminal, the portable telecommunication terminal being provided for displaying at least a portion of the information on a display member of the portable telecommunication terminal. The invention also relates to an electronic key and to a method for communicating information from a vehicle to a portable telecommunication terminal.
