Abstract (en)
[origin: WO2008120115A2] The invention relates to a method for packaging a liquid in a plastic container (1) having a strong molecular orientation. The inventive method comprises the following steps: the container (1) is filled with a liquid at high temperature; the walls (5) of the container (1) are cooled during the filling step; the container (1) is sealed; the walls (5) of the container (1) are cooled during the sealing step; the container (1) undergoes passive retraction following the sealing step; and the walls (5) of the container (1) are cooled following the retraction step. The invention also relates to a device for implementing said method and to the resulting container.
