Abstract (en)

[origin: WO2008110250A1] The invention relates to a fabric in the form of a knitted, woven, or a nonwoven type of article of clothing or for a seat cover or for a textile surface or for an element made of a textile, with fibers or bundles of fibers which are integrated therein or applied thereon or completely or partially formed thereby. Said fibers or bundles of fibers have a plurality of synthetic filaments which carry a conductive coating on the surface thereof, which fabric is characterized in that the synthetic filaments composed of poly(p-phenylene-2,6-benzobisoxazole) are formed with a coating composed of a conductive layer.
