Abstract (en)
[origin: DE102007009795B3] The part (1) is detachably connected with a filter or attachment screen (4) in an inflow-sided front side. A handle is presided over at an inflow-side of the screen and is formed as a protrusion (7) that is connected with the screen formed as a single piece and as a plastic injection molding part. An outer peripheral wall forming the protrusion is arranged with radial distance to an inner peripheral wall of a pipe section. The protrusion has flow openings (10) at a free front surface and/or at a peripheral wall.
