Abstract (en)

[origin: WO2008107158A1] The invention relates to a method for determining an equalizing charge of an accumulator (2), wherein the accumulator (2) is overcharged past a nominal fully charged state, comprising the following steps: detecting fully charged operating phases in which the accumulator (2) is at least in the nominal fully charged state, and adding the charge levels (Ah) charged into the accumulator (2) in the fully charged operating phases in order to obtain the value of the equalizing charge.
