Abstract (en)
[origin: EP2130452A1] The applicator (14) has a rigid or semi-rigid support strip and an application unit e.g. individual brush, held by the strip, where the applicator is made of rigid or semi rigid material. A removable fixation unit is formed of tabs, and fixes the strip along a longitudinal axis (A) of an elongated cylindrical shaped body (16) of a container (12) through clipping, so that the container forms a handle for using the applicator. Flexible tabs are fixed on the body of the container and extend in a plane perpendicular to the strip.
