Abstract (en)  
[origin: EP2130680A1] The machine (10) has processing stations (30) e.g. digital printing station (34), pretreatment station (31), cooling station (32), drying station, priming station (33) and bonding agent applying station, and printing goods carriers (20) movable relative to the processing stations. A base frame (11) comprises retaining areas (12) for retaining the processing stations. The retaining areas comprise connection units for fastening the stations. The processing stations comprise connecting regions including other connection units that correspond to the connection units of the retaining areas. An independent claim is also included for a method for printing on a printing material.
