Abstract (en)

[origin: EP2130771A1] The device comprises a covering device and a protective film stock which supplies a protective film (1). The lateral wall of the goods stack (2) is covered by a protective film. A film strip is applied on the goods stack and circulated on the circumference of the goods stack, where the film strip is a protective film section (8). An independent claim is included for a method for covering a protective film over a goods stack.
