Abstract (en)

The invention relates to a composite article carrier, a kit of parts for forming the composite carrier and a method of assembling a composite article carrier. The composite article carrier comprises an article holder having one or more compartments for receiving, in a top-loaded fashion one or more articles. The article holder is attached, by means of flanged portions and/or a detachable compartment top panel, to a complementary panel. The complementary panel attaches to the article holder by means of sandwiching the flange and/or top panel between flanges and/or a partition panel of the complementary panel.
