Abstract (en)
[origin: EP2131118A1] The multiple-row heating body has a flow connection and a reverse flow connection for a heating medium of a heat distribution system. A flow permeable heating body plate is arranged opposite to the space to be heated and another flow permeable plate is arranged within the space to be heated. The lower connection fittings (c,d) are in fluidic connection with the flow connection or reverse flow connection and are connected with each other by an overflow pipe. The overflow pipe is arranged horizontally between heating plates (21).
