Abstract (en)
[origin: EP2131126A2] The retainer has a cooling storage compartment i.e. door bin (1) with a horizontal bar (9) that is vertically oriented in a refrigerator device. A support frame (13) is pivotable around a pivot (12) between a horizontal position for holding cooling goods and a vertical position that is provided parallel to the wall surface. The wall surface has an opening (10), in which the support frame is gripped in the horizontal position. The opening has a gap between two horizontal bars. The support frame is contacted below the pivot in another vertical position.
