Abstract (en)
[origin: EP2131136A2] The magazine has a guide (1) incorporated in a wall (2), and belted ammunition (4) whose belt units (3) are engaged with the guide and are supplied to a weapon. The guide is designed as a T-shaped recess (10). Two guiding lugs (5) of the belt units run behind projections (6) of the recess. The projections are aligned to the geometry of the guiding lugs. A chamfer is incorporated in the guide and/or the wall in a lower area (7) of the belt units. The guiding lugs are used for transportation of the ammunition.
